

Introducing the Full Circle Sanding System

Sanding made fast and easy

Go to www.fullcircleinternational.com to
watch our sanding system in action.

Radius360° Sanding Tool

New center hub design!

Over the past 7 years, the Radius360° has simply changed how professionals sand paint and drywall. The 9" diameter head provides unparalleled range of motion and finish quality. Full Circle International is pleased to introduce the future of sanding. The redesigned Radius360° is the same great tool with the added ability to transform your pole sander to a handheld sander, or to switch out the round shape for the triangular head of the new Trigon180° sanding tool for detail corner sanding. The new Radius360° has a detachable center hub, which easily snaps in and out via a cam lock mechanism. This center hub can be snapped into the new Trigon180° sanding tool, or can be interchanged with the hub of the Pro Handle Adapter.

- No flipping, skipping, or scratching. Movement is flawless with round shape.
- 90% larger than standard rectangle pole sander, making it the largest surface area sander on the market.
- Oval adapter makes quick and easy change from pole sanding to hand sanding with the Pro Handle Adapter.
- Round pliable .50" hook & loop pad forms perfectly to the contours of curved surfaces such as barrel vaults, arches, domes and uneven walls.
- Up to 3 times faster than a conventional sand pole, with better results.

Replace the pad, not the tool!

The detachable foam disc forms to the wall, providing a smooth, even finish. Unlike the conventional sand pole, this foam disc wears evenly, greatly increasing the life of the tool. Replacement pads utilize hook and loop backing making for easy replacement. Two replacement pads to choose from – standard density and the thinner 1/4" foam pad.

Level360° Sanding Disc

Our aluminum oxide paper is clog resistant and self sharpening for longer life. Loop backed sandpaper firmly attaches to the foam disc, preventing debris from collecting behind the sandpaper, and eliminating a major cause of streaking. Level 360 discs are available in 7 grits for all your needs.

Change your tool, change your mind!

The large triangular head and specialized pivot mechanism make the Trigon180° a great non-flip detail sander. The Trigon180° is 56% larger than standard rectangle sanders. The replaceable all in one pad and bumper make corner sanding stutter free and fluid without damaging the adjacent corner.

- All In One pad and bumper give a flawless finish without gouging inside corners.
- No flipping, skipping, or scratching.
- Triangle shaped tool and pad sand tight to inside corners.
- 56% larger than standard rectangle sanding head.
- Removable center hub makes quick and easy change from pole sanding to hand sanding with the Pro Handle Adapter.
- Hook & loop stearted, no-build sand paper lasts longer and won't load.
- Perfect for sanding drywall and in between coats of paint and polyurethane.
- Up to 3 times faster than conventional sand pole, with better results.

Trigon 180° Replacement Pads

Replaceable pad and bumper ALL IN ONE! The one quarter inch pad has 2 layers: The rubber layer provides shock absorption while the foam layer provides the perfect cushion for streak free sanding. No damage to the adjacent surface with the built in bumper!

LEVEL 180° Sanding Sheet

Long lasting and no build. The stearted aluminum oxide paper stays sharp and provides a flawless finish. Great for sanding drywall and for scuff sanding paint and polyurethane between coats.

Pro HANDLE ADAPTER

- Quick and easy cam lock changeability for both the new Radius360° and the Trigon180°
- Better control for detail sanding
- Ergonomic design

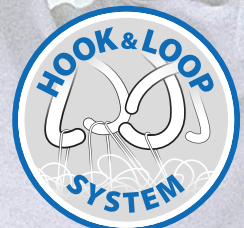

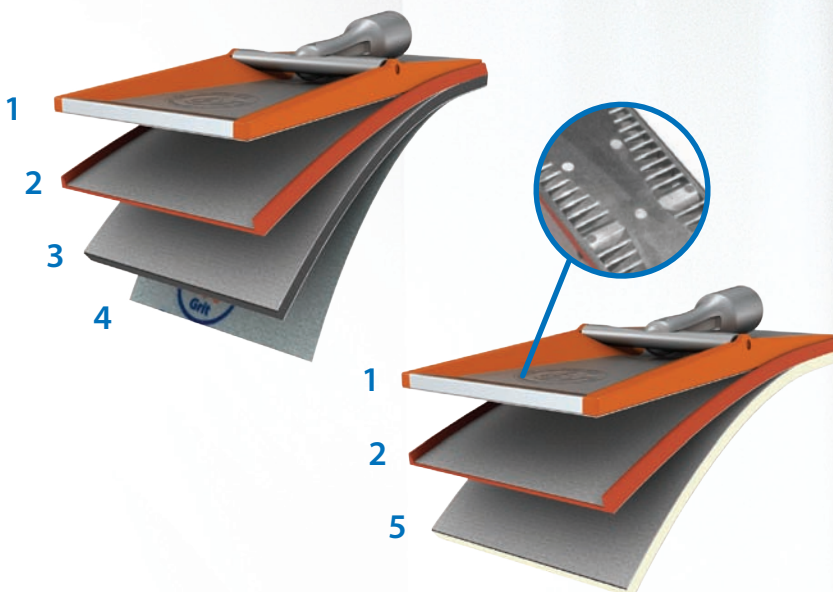

Leverage is important when sanding. The ability to manipulate the work surface with a low center of gravity is extremely useful for detail sanding and removing stubborn ridges. The Pro Handle Adapter transforms your new Radius360° and Trigon180° pole sanders into ergonomic hand sanders.

FLEX EDGE®

- 1. ALUMINUM HEAD** – Non-flip design with low center of gravity. Die-cast aluminum with a weight reduction design 11.5 oz.
- 2. PRESSURE PAD** – The patented design is our secret weapon! Added core pressure eliminates bumps and prevents binding and stuttering to ensure a faster, higher quality finish.
- 3. 1/4" FOAM PAD** – For use with our economical Flex Paper, this pad helps the paper hug the wall for a flawless finish.
- 4. FLEX PAPER** – A durable, economical abrasive for fine finishes at an excellent price.
- 5. FLEX FOAM** – Resilient 1/4" foam abrasive provides a fine finish without bridging over low areas.

Change your layer, change your tool!

Designed to complement the Radius 360°, the FlexEdge system handles a variety of sanding challenges with everything you need to take on corners, tight angles, outlets, bumps, and more. Wide design 3½" to over lap corner tool lines. Swap out the abrasives on your FlexEdge for the right tool for any job – the FlexEdge leaves a perfect finish every time!

Adapter Plate

The Trigon180° Adapter Plate is for users who already own the center hub version of the Radius360°. Packaged with the Trigon180° cast aluminum adapter plate and foam pad, this plate is ready to snap into the center hub of your Radius360° sanding tool, instantly creating a corner and detail sander. The Trigon180° Adapter Plate can also be used with the Pro Handle Adapter creating a hand held corner tool.

Precision that lasts.

This sturdy, washable sanding sponge handles tight corners and other close quarters without scuffing nearby surfaces. Built to last for the long haul, the unique angles allow you to cut a neat line every time! Available in medium and fine grit.

- Angled sides aid in sanding interior angles without damaging adjacent walls, ceilings or trim.
- Allow sanding into tight areas.
- 75 degree angle allows the point of the sponge to have firmer structure which creates durability and cuts a clean line in the corner.
- Use over wood, paint, drywall, metal, fiberglass or plastic.
- Conveniently sold in 36-pack or 100-pack.

4ft Fixed Length Pole

The FX4 Lightweight Pole weighs in at only 13 ounces. The ergonomic design creates less fatigue and stress on your hands. The FX4 has a larger 1 1/4" diameter and a rubber hand grip for comfort. The soft hand grip won't damage opposite walls when sanding in close quarters. Standard threaded end.

PowerPad

The Full Circle Power Pad is designed to work with both the Porter Cable 7800 and Flex power sanders. The Power Pad attaches your Full Circle Level 360 Sanding Disc to the power sander with a firm, seamless adhesion using hook-and-loop technology. This solid contact gives the power pad structural integrity, so you get the same performance as a fixed abrasive pad at a fraction of the cost.
